1 Motivation

2 Model and Identification

3 Results

4 Conclusion

Research Perspective

- Prior Work and Research Gap
- Theory Contribution
- Method Contribution

Practical Perspective

- Company Level
- Individual Level
- Society Level

Baseline Specification

$$y_{it} = \beta X_{it} + \gamma_i + \delta_t + \varepsilon_{it}$$

Discuss assumptions, data, and empirical logic.

- Strategy: DiD / IV / Fixed Effects
- Address threats to identification
- Validation and robustness

Interpret magnitude and significance clearly.

- Main Takeaway 1: concise and impactful
- Main Takeaway 2: robustness summary
- Implication: academic and managerial relevance

Extra tables, figures, and robustness checks.
